M1 — *Installing OverDrive Media Console on your Mac**

What you'll need to get started:

• A computer with Mac iOS 10.4.9 or newer
• Intel or PowerPC Processor
• iTunes version 7.6.2.9 or newer

Note: WMA files are NOT compatible with Macs

Go to **http://delaware.lib.overdrive.com**

Go to the bottom of the page and click "Applications."
Click **"OverDrive." Click "Download OverDrive."**
Click **"Available for Mac."**.

Click **"Save File."** Double click the installation file once download is complete. You may need to go back to the desktop and double click on the **OverDrive** file. Then double click on the file to open the **installation wizard**.

Click **"Continue"** Review the Licensing Agreement. Click **"Continue"** Click **"Agree".** Click **"Install"** to begin the installation. Once the installation is complete, click **"Close."**

To locate the file, go to **Finder** and search your **Applications** for the **OverDrive** app. Double click to open the file. It will then also appear in your dock.

M2 — *Burning an MP3 eAudiobook to CD using ODMC for Mac*

What you'll need to get started:

• OverDrive for Mac version 1.1 or newer
• Blank recordable CD (CD-R or CD-RW)
• A CD/DVD burning drive on your computer
• Downloaded audiobook (To check out an audio-book see the **MP3** or **iPod** handout.)

Please respect the digital rights and destroy the CD at the end of the lending period

---

To see if your title can be burned to CD go to the digital library catalog **(delaware.lib.overdrive.com),** hover over the title , then click **"more"** to open its details page. Scroll down, then click **"Digital Rights Information.**

Open OverDrive by double-clicking on the icon on your desktop.

Click on the title that you wish to burn and click the **"Burn"** button at the top of the screen.

Insert a blank CD into your computer's disc drive. (You'll need one CD for each part.) Click **"Next"** Select the parts to transfer. Click **"Next."** When the burn is complete, click **"Finish."**

Why won't it play?

If you're having trouble listening to the CD you burned, check to make sure that your CD player will play CD-R discs. If you used a CD-RW disc, try burning the title again using a CD-R. Most players have trouble with CD-RWs for audio CDs.

P1 *Installing OverDrive on your Windows PC*

What you'll need to get started:
- A computer with Windows XP or newer
- Microsoft Internet Explorer 7 or newer
- Windows Media Player 9 or newer (to download WMA files) Most computers have this pre-installed, if you need to reinstall it or upgrade to version 9 or newer, go to: http://windows.microsoft.com/en-US/windows/downloads/windows-media-player

To download OverDrive for Windows, click **"Download for Windows Desktop"** at http://omc.overdrive.com/windows.php

Click **"Save File."** Double click the installation file once download is complete. Click **"OK."**

Click **"Run"** to open the ODMC Installation Wizard.
Click **"Next."** Review the Licensing Agreement.
Click **"I Agree."** Click **"Next."** Click **"Next"** again.

Click **"Next"** to begin the installation.
Once the installation is complete, click **"Close."**
Minimize all windows to return to your desktop. Double click on the Overdrive Media Console icon.
P2 *Performing the Windows Media Player Security Upgrade*

The first time you try to download a title to ODMC software on your computer, you may receive a prompt to upgrade the
security of Windows Media Player. This upgrade is needed in order to play WMA-formatted titles protected with DRM (Digital Rights Management.)

You can also launch the update yourself. In the OverDrive Media Console: Click on **Tools** > **Windows Media Player Security Upgrade**. Click **OK** to open Windows Media Player.

The next steps will vary slightly depending on which version of Windows Media Player you have.

For Version 11
Click **"OK"** to Open Windows Media Player. Click **"Upgrade"** in the Windows Media Player dialog box.

Click **"Close"** once the upgrade is complete. Then click **"Play"** *in Windows Media Player* to confirm that you have completed the upgrade.

For Version 9 or 10
Click **"OK"** to Open Windows Media Player. Click "OK" in the Security Upgrade Required dialog box.

If you get an Active X pop up in the next window, Click the message and then click **"Run Add-On"** Click **"Play"** to complete the upgrade.

Still having trouble? While connected to the Internet and using Internet Explorer, go to:
http://drmlicense.one.microsoft.com/Indivsite/en/indivit.asp Click **"Upgrade"** & follow the prompts.

P3 *Burning a WMA or MP3 eAudiobook to CD using OverDrive for Windows*

What you'll need to get started:
- OverDrive for Windows version 3.2. or newer
- Blank recordable CD (CD-R or CD-RW) (1 disk for each part of the eAudiobook)
- A CD/DVD burning drive on your computer
- A downloaded audiobook (To check out an eAudiobook see the **MP3** or **iPod** handout.)

Please respect the digital rights and destroy the CD at the end of the lending period.

To see if your title can be burned to CD, click a title to open its details page. Scroll down, then click **"Digital Rights Information."**

Open OverDrive by double clicking on the icon on your desktop.

Click on the title that you wish to burn and click the **"Burn"** button at the top of the screen.

Insert a blank CD into your computer's disc drive. Click **"Next"** Select the parts to transfer. Click **"Next."** When download is complete, click **"Finish."**

Why won't it play?
If you're having trouble listening to the CD you burned, check to make sure that your CD player will play CD-R discs. If you used a CD-RW disc, try burning the title again using a CD-R. Most players have trouble with CD-RWs for audio CDs.

Because OverDrive **WMA files** have DRM protection, you need to burn **audio CDs** for library titles. **Each part of a title requires a CD.** If you copied the WMA files directly to a CD, **it will not work**.
